

HW9

Update TestAmazonSearch.java test case to TestAmazonSearchDataDriven.java
Replace all Thread.sleep() by at least one Implicit waits and Explicit waits;
Using data driven either from Excel sheet or BDD feature file
Capture screenshot(s), the image names append with Date time.

}
```

- **testAmazonSearchDataDriven.feature**

Feature: Open Amazon website to explore the products

Scenario: Verification of searched product and take a screenshot

Given Open the Chrome and launch the amazon application

When Maximize window

And Select Category

And Product Search

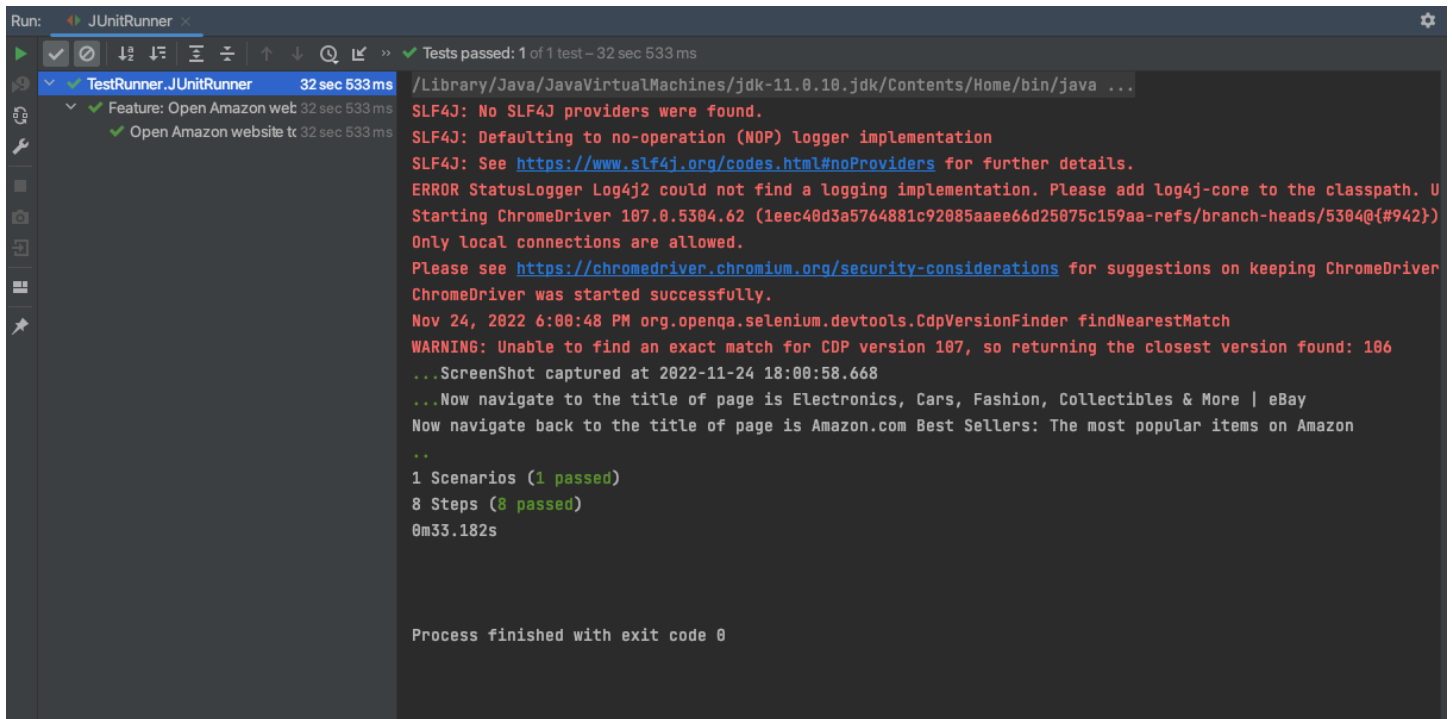

And Take Snapshot

And Open link BestSellers

And Navigate to ebay and back to amazon

Then Close and exit

- **Attached Log**

The screenshot shows a JUnitRunner window with a dark theme. The left sidebar displays a tree view with the following structure:

- JUnitRunner (32 sec 533 ms)
 - Feature: Open Amazon web (32 sec 533 ms)
 - Open Amazon website (32 sec 533 ms)

The main console area shows the following output:

```
